

CLIMATE SERVICES FOR A
CLIMATE-RESILIENT EUROPE

POLICY ROUNDTABLE ON CLIMATE ADAPTATION AND RENEWABLE ENERGY

2 DECEMBER 2020, 10:45-12:15 CET

S2S4E, an H2020 project providing Climate Services for Clean Energy, is hosting a policy session as part of the European Commission/EASME's online event “**Climate services for a climate-resilient Europe: Success stories, lessons learnt and remaining challenges**”.

The event aims to showcase the added-value and potential of climate services in making Europe resilient to climate change. European Horizon 2020 projects will share best practices, lessons learnt and challenges in developing climate services, and at the same time build new partnerships and explore exploitation opportunities.

S2S4E will participate at this event with a break-out session with discussion based on the recommendations elaborated in the project's [white report](#). These recommendations result from the lessons learnt during the project and address the next steps for climate services aimed at the energy sector.

10:45 - Panel 1

Climate information needs & integration across energy systems' timescales

11:15 - Panel 2

Applications of climate forecasts in risk management

11:45 - Panel 3

Communicating uncertainty: what is next in climate services for renewable energy?

Each panel will involve a short presentation, panel discussion and Q&A session.
